## What are the risks and what could I get in return?

### Risk indicator

The risk indicator assumes you keep the product for 5 Years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the fund to pay you.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances you may be required to make further payments to pay for losses.

Due to effects of unusual market conditions, other risks could be triggered, such as: counterparty risk and liquidity risk. Please refer to the KIID for more detail.

This Product does not include any protection from future market performance so you could lose some or all of your investment.  
If we are not able to pay you what is owed, you could lose your entire investment.

## Performance scenarios

What return you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 Years Investment: 10 000 USD			
Scenarios		1 Year	5 Years (recommended holding period)
Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress scenario	What you might get back after costs	2 460 USD	2 470 USD
	Average return each year	- 75.4 %	- 24.39 %
Unfavourable scenario	What you might get back after costs	6 910 USD	7 510 USD
	Average return each year	- 30.89%	- 5.58%
Moderate scenario	What you might get back after costs	10 090 USD	11 550 USD
	Average return each year	0.94%	2.93%
Favourable scenario	What you might get back after costs	16 460 USD	20 530 USD
	Average return each year	64.58%	15.47%

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between July 2021 and January 2024.

Moderate: This type of scenario occurred for an investment between December 2014 and November 2019.

Favourable: This type of scenario occurred for an investment between March 2016 and February 2021.

## What happens if the Product Manufacturer is unable to pay out?

The Management Company is responsible for administration and management of the Fund, and does not typically hold assets of the Fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Management Company, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any, of this loss.

## What are the costs?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

## Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario.

- USD 10 000 is invested.

Investment: 10 000 USD	If you exit after 1 Year	If you exit after 5 Years
Total Costs	88 USD	519 USD
Annual Cost Impact (*)	0.88 %	0.91 %

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.84% before costs and 2.93% after costs.

## How long should I hold it and can I take money out early?

**Recommended holding period:** 5 Years

This product is designed for long term investments; you should be prepared to stay invested for at least 5 years. However, you can redeem your investment without penalty incurred for disinvestment prior to the end of the recommended holding period, or hold the investment longer. Redemptions must be received by the registrar and transfer agent no later than 4pm GMT to be dealt with on the basis of the net asset value per share applicable on that valuation date. Redemptions received by the registrar and transfer agent after that cut-off time will be dealt with on the next valuation date. Redemptions may be made in a number of shares. Redemption payments will be affected three (3) Bank business days, which are also days when the relevant foreign exchange market is open, after the redemption of the shares. Any cashing-in before the end of the recommended holding period may have a negative consequence on your investment.
